ArcGIS Online Training Guide

Overview
ArcGIS^SM Online is a cloud-based mapping platform for organizations. Users get access to dynamic, authoritative content to create, collaborate, catalog, and share maps, data, and applications with each other, the entire organization, or the public. Through ArcGIS Online, organizations gain private access to the secure Esri® cloud, which is scalable and ready to use. ArcGIS Online requires no additional hardware or software and is available through an annual subscription.
